111

SCHEDULE OF COMMODITIES

DIRECTIONS FOR USE

IMPORTANT

SIGNIFICANCE OF COLUMN HEADINGS:

- "Commodity Code Symbol" - The identification symbol assigned to designate individual commodity descriptions.
- "Description" - The identifying characteristics of individual commodities.
- "Unit of Quotation" - The unit of an individual commodity upon which price quotations will be based.

NOTES

The commodity descriptions, code symbols, and units of quotation appearing in this schedule are to be used for pricing purposes only. Commodities will be ordered and shipped as in the past. Consideration is being given to the development of a code which will serve as a basis both for ordering goods and for pricing.

Commodities are grouped together, with full information relative to the grade or class, type or variety, under the column headed "Description". Likewise, there is shown in this column the kind of primary container and the container size, where definite size can be indicated.

With regard to the items procured in such units as bales, barrels, boxes, cases, crates, drums, tins, tierces, sacks, etc., information relative to the particular type in which the individual commodity is ordinarily procured and stored is also stated under "Description". When necessary to distinguish the items for purposes of shipment or rehandling, a further classification indicating "Domestic" or "Export" is used.

Symbol numbers are utilized for the purpose of identifying the commodity descriptions so established. The symbol assigned for designating a commodity shall be known as the "Commodity Code Symbol" and is to be used as the media of identification with respect to price quotations and invoicing.

In compiling these commodity descriptions, an attempt has been made to list the articles logically under the appropriate agricultural classification or trade term applicable. An attempt has also been made to list the detailed data logically under the classification captions to show the gradual development or description of individual commodities.

All commodities relevant to current operational requirements for which definite unit-commodity quotations will be established are included in the schedule, it being understood that any addenda or errata affecting it are also applicable.

The schedule will be revised from time to time, and commodities hereafter procured for program purposes or for commodities in reserve will be announced by supplements thereto.

Requisitions involving an assortment of commodities, usually in small quantities, the fulfillment of which requires in whole or in part the procurement of items by "Special Purchases", will be classified as unit transactions. Such transactions will be assigned serial numbers, and individual commodities will not be identified by the code set forth in this schedule.

The price at which each commodity is to be sold or transferred, except for "Special Purchases", will be published and distributed periodically under separate releases.

ADVICE OF CHANGE IN SCHEDULE OF COMMODITIES

Effective Period July 1 to August 31, 1943

Change Notice No. 1

This notice directs changes to be made in the codified schedule of commodity descriptions as specified herein and shall revise, modify or amplify the schedule for the period designated.

This notice should be inserted at the front of the booklet, "Schedule of Commodities", and will effect additions or revisions in the text of the schedule to provide correct information regarding commodities sold or transferred which heretofore have been improperly or inadequately described or classified.

Changes shown herein should be made in the text of the schedule itself where space permits; otherwise, a reference to the change notice, citing the document number and effective period, should suffice to inform the user that a change has been made.

ADVICE OF CHANGE IN SCHEDULE OF COMMODITIES

Effective Period July 1 to September 30, 1943

Change Notice No 34

This notice directs changes to be made in the codified schedule of commodity descriptions as specified herein and shall revise, modify or amplify the schedule for the period designated.

This notice should be inserted at the front of the booklet, "Schedule of Commodities", and will effect additions or revisions in the text of the schedule to provide correct information regarding commodities sold or transferred which heretofore have been improperly or inadequately described or classified.

Changes shown herein should be made in the text of the schedule itself where space permits; otherwise, a reference to the change notice, citing the document number and effective period, should suffice to inform the user that a change has been made.
